

S.No	Question	Answer Options
1	What happens to water vapour?	<div style="display: flex; flex-direction: column; align-items: center;"> <div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;">It Remains In The Same State</div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;">It Condenses Into Tiny Droplets Of Water</div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;">It Becomes Solid</div> <div style="border: 1px solid black; padding: 5px;">None Of The Above</div> </div>
2	Fill in the blank : On a very cold winter night water vapour condenses and freezes on cold objects into ice crystals. This is called _____.	<div style="display: flex; flex-direction: column; align-items: center;"> <div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;">Fog</div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;">Snow</div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;">Sleet</div> <div style="border: 1px solid black; padding: 5px;">Frost</div> </div>

3

Fill in the blank : The amount of water vapour present in the air is called _____.

Evaporation

Condensation

Humidity

Gaseous

4

Fill in the blanks : Water changes its state of _____ with change in temperature.

Answer

5

State if the following statement is TRUE or FALSE : Dew is formed due to the condensation of water vapour.

True

False

Correct Answer is

1. Correct Ans option is It Condenses Into Tiny Droplets Of Water
2. Correct Ans option is Frost
3. Correct Ans option is Humidity
4. Correct Answer is matter
5. Correct Ans option is True
