

S.No	Question	Answer Options
1	What is the name of the alloy of aluminium, nickel and cobalt that is used to make powerful permanent magnets?	Alnico <input type="checkbox"/>
		Alconi <input type="checkbox"/>
		Nicoal <input type="checkbox"/>
		None of these <input type="checkbox"/>
2	Magnetic materials have tiny magnetised regions called _____.	Periods <input type="checkbox"/>
		Poles <input type="checkbox"/>
		Domains <input type="checkbox"/>
		Keepers <input type="checkbox"/>

3	<p>_____ are used in household appliances such as refrigerators and vacuum cleaners.</p>	<p>Bar Magnet</p> <p>Cylindrical Magnet</p> <p>Electromagnet</p> <p>Circular Magnets</p>	<p><input type="checkbox"/></p> <p><input type="checkbox"/></p> <p><input type="checkbox"/></p> <p><input type="checkbox"/></p>
4	<p>To trace the lines of force of a bar magnet we need a _____ .</p>	<p>Answer</p> <p>_____</p>	
5	<p>The single touch method will magnetise a magnetic material by rubbing the magnet with it just once.</p>	<p>True</p> <p>False</p>	<p><input type="checkbox"/></p> <p><input type="checkbox"/></p>

Correct Answer is

1. Correct Ans option is Alnico
2. Correct Ans option is Domains
3. Correct Ans option is Electromagnet
4. Correct Answer is compass
5. Correct Ans option is False
