

S.No	Question	Answer Options
1	Find the volume of the cylinder if Radius = 2 inches and height = 25 inches. _____ in ³	Answer _____
2	Calculate the volume of a Sphere ($\frac{4}{3}\pi r^3$) with a diameter of 4 yd = _____ yd ³	Answer _____
3	Find the volume of a cuboid (length * width * height) Given Length = 52 cm, Width = 32 cm, Height = 35 cm _____ cm ³	Answer _____
4	Calculate the volume of a Sphere ($\frac{4}{3}\pi r^3$) with a radius of 7 yd = _____ yd ³	Answer _____

5

<p>Solve the problem : Calculate the volume of a Cube ($V = \text{Side}^3$) How much water does a tank with equal dimensions of 3.3 feet holds _____ ft³</p>	<p>Answer _____</p>
--	-------------------------

Correct Answer is

1. Correct Answer is 314.16
2. Correct Answer is 50.33
3. Correct Answer is 58240
4. Correct Answer is 615.8
5. Correct Answer is 35.94
