

S.No	Question	Answer Options
1	What is tensile strength?	<div data-bbox="815 457 1151 554">The Ability To Withstand Hammering And Be Beaten Into Sheets</div> <div data-bbox="815 554 1151 651">The Property By Which Metals Can Be Drawn Into Wires</div> <div data-bbox="815 651 1151 747">Resistance Of A Metallic Wire To Pulling Action</div> <div data-bbox="815 747 1151 844">Resistance Of Cutting Scratching Or Grinding</div>
2	Choose the correct option and fill in the blank : What is metallic lustre?	<div data-bbox="815 974 1151 1071">The shiny appearance of metals</div> <div data-bbox="815 1071 1151 1167">The hardness of metals</div> <div data-bbox="815 1167 1151 1264">The colour of metals</div> <div data-bbox="815 1264 1151 1360">The conductivity of metals</div>

3

Choose the correct option and fill in the blank : Which of these metals can be extracted by heating alone?

Metals that are low in the activity series

Metals that are in the middle of the activity series

Metals that are high in the activity series

All of the above

4

Fill in the blank with the appropriate answer :  
\_\_\_\_\_ is a liquid non-metal.

Answer

\_\_\_\_\_

5

O<sub>2</sub> is a good conductor of heat.

True

False

Correct Answer is

1. Correct Ans option is Resistance Of A Metallic Wire To Pulling Action
2. Correct Ans option is The shiny appearance of metals
3. Correct Ans option is Metals that are low in the activity series
4. Correct Answer is Bromine
5. Correct Ans option is False
