

S.No	Question	Answer Options
1	What is tensile strength?	<div data-bbox="816 457 1151 554">The Ability To Withstand Hammering And Be Beaten Into Sheets</div> <div data-bbox="816 554 1151 651">The Property By Which Metals Can Be Drawn Into Wires</div> <div data-bbox="816 651 1151 747">Resistance Of A Metallic Wire To Pulling Action</div> <div data-bbox="816 747 1151 844">Resistance Of Cutting Scratching Or Grinding</div>
2	Choose the correct option and fill in the blank : Which of these metals can be extracted by heating alone?	<div data-bbox="816 974 1151 1071">Metals that are low in the activity series</div> <div data-bbox="816 1071 1151 1167">Metals that are in the middle of the activity series</div> <div data-bbox="816 1167 1151 1264">Metals that are high in the activity series</div> <div data-bbox="816 1264 1151 1360">All of the above</div>

3

Choose the correct option and fill in the blank : What is metallic lustre?

The shiny appearance of metals

The hardness of metals

The colour of metals

The conductivity of metals

4

Fill in the blank with the appropriate answer :
_____ is a liquid non-metal.

Answer

5

O₂ is a good conductor of heat.

True

False

Correct Answer is

1. Correct Ans option is Resistance Of A Metallic Wire To Pulling Action
2. Correct Ans option is Metals that are low in the activity series
3. Correct Ans option is The shiny appearance of metals
4. Correct Answer is Bromine
5. Correct Ans option is False
